

An add-on accessory for our Series-3 SSR-XT radars, the Alert Pack dispatches various alerts via multiple channels.

+ Safety-Critical Alert Pack

GroundProbe's Alert Pack adds an enhanced level of safety to our targeted monitoring technologies. The add-on solution of local and personal alerts ensures the earliest possible warning for evacuation in the shortest possible time.

THE PACK INCORPORATES:

- Pagers - Portable Personal Alert (PAL) devices, worn on the person, that beep and vibrate up to 750m away
- Siren - An audible siren alert heard up to 1,500m away

- Warning lights - Light system mounted on the SSR pole that give off visual warning

Controls are housed in a rugged pelican case, easily mounted under the power supply on the SSR trailer and powered from the radar power supply.
